

Environmental policy

Cargill Izegem

Introduction and purpose.

Cargill Izegem is part of the Cargill Oils & Seeds business. In Izegem vegetable oils are refined and bottled. We are aware that our activities have an influence on: emissions to the air and water, energy consumption and the creation of waste.

Cargill Izegem will comply with all applicable environmental requirements, prevent pollution, and continually improve performance on criteria relevant to its businesses and operations. This policy shows how to reach this target.

Responsibility.

The environmental policy applies to all activities including management, office services, factory activities and purchasing.

The plant superintendent ensures that sufficient resources are available to meet the environmental objectives.

The environmental coordinator has the responsibility to monitor the effectiveness of the objectives. However, all employees have the responsibility to ensure that the purpose and objectives of this policy are met in their work environment.

Objectives

The following objectives have been set:

- Efficient use of natural resources by saving energy and water, reducing waste and, where possible, recycling.
- Keep noise pollution to a minimum.
- Keep light nuisance to a minimum.
- Keep odour nuisance to a minimum.
- Keep impact on surface waters as low as possible and under control.
- Prevent soil pollution

Marco Moes
Plantsuperintendent GEOS Izegem
